

VERSION 1.0

BAT INU

WHITEPAPER

STORY AND PURPOSE

BatInu is a project aimed at reunite and strengthen the community and bring people from diverse domains with different background together. To reach this noble goal, we created a complementary team where the sharing of knowledge and skills make our strength. We are 11 in total, 4 devs, 2 marketing managers and 5 admin to manage the telegram 24/7

We chose to draw inspiration from the Batman universe and the multicultural and socially diverse Gotham city. This diversity is well represented by the BSC and suits our purpose perfectly. We decided to fusion it with the Inu universe, who are, before all, a strong and united community ! In the BSC there are good people and bad people.

STORY AND PURPOSE

The later are very often powerful and well informed and the former are usually weakened by a lack of knowledge of the market.

BatInu team was formed to reunite all the good people travelling to our city and create an alliance with a shared goal and vision: Get rid of all the scammers and clean Gotham city. We want to reach out to our community and bring a refreshing sense of loyalty, honesty and profitability for everyone!

For the first time in the Gotham universe, Batman, Robin and Catwoman will join forces with the Joker and the Penguin to fight scammers. In us are a strong and together they can accomplish everything! Whether you're a beginner or an expert, whether you're a professional with a huge budget or an amateur with little to no budget, join this epic team and be ready to make history !

HOW BAT INU WORKS

Bat Inu is a 100% meme, deflationary and reflective token.

Bat Inu is driven by community.

What does all this gibberish mean?

Very simple, the longer you keep your BATINU tokens the more you will earn.

With each purchase or sale of the token, there is a 12% tax which is itself divided into 3 taxes: 5% will be directly burned by the Joker and 6% will be redistributed to all holders.

1% will be sent in a marketing wallet.

The marketing fee will be used for paid influencer and promote the Bat Inu.

TOKENOMICS

Total Supply
100,000,000,000

Initial Burn
10,000,000,000

Team Tokens
2% ([See Lock here](#))

Airdrops, Giveaways & Contest
2%

CORE TEAM

I am the Bat. The creator of the Bat Inu. Leader but also instructor in the Bat team, my goal is to clean up Gotham Inu and prove that a united team can achieve anything!

Official side kick of the Bat, I am here to welcome newcomers to the Bat team. Always on the lookout for the latest news, I'm involved in the project as well as in my secret relationship with the Bat !

I am known as the villain of the story but that is not the case today. I want to see the scams and other non-serious projects burn. Gotham Inu is MY city and no one will stain it.
